## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to electronic digital logic circuitry, classified in class 326, subclass 32.
  - II. Claims 11-18, drawn to multiplex communications, classified in class 370, subclass 241+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the CMOS circuit comprising a first gate reference voltage, a first bias current is not intended to be used together with the physical layer segment including a transmitter and a receiver. The group I recites a CMOS circuit whereas the group II recites a physical layer segment for multiplexing circuit. Therefore, they have different modes of operation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2819

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
